Service Manual

DVD Player

DVD-K32GCS / DVD-K32PL / DVD-K32PLA

DL4.5 Mechanism Series

Color

(S).....Silver Type

SPECIFICATIONS

Specifications

Power supply:	AC110-240 V, 50/60 Hz (DVD-K32GCS/PL) AC120 V, 60 Hz (DVD-K32PLA)
Power consumption:	10 W
Power consumption in standby mode:	Less than 1.5 W
Dimensions:	430 (W) × 251 (D) × 43 (H) mm
Mass:	2.2 kg (approx.)
Signal system:	PAL 625/50, PAL 525/60, NTSC (DVD-K32GCS) NTSC (DVD-K32PL/PLA)
Operating temperature range:	+ 5 to + 35 °C
Operating humidity range:	5 to 90 % RH (no condensation)
Discs played [8 cm (3 ") or 12 cm (5 ")]:	
(1)	DVD (DVD-Video)
(2)	DVD-R (DVD-Video, MP3*2,4, JPEG*3,4)
(3)	DVD-RW (DVD-Video, MP3*2,4, JPEG*3,4)
(4)	+R/+RW (Video)
(5)	DVD-R DL (DVD-Video)
(6)	+R DL (Video)
(7)	CD, CD-R / CD-RW (CD(CD-DA), Video CD, SVCD*1, MP3*2,4, JPEG*3,4)
*1	Conforming to IEC62107
*2	MPEG-1 Layer 3, MPEG-2 Layer 3
*3	Exif Ver2.1 JPEG Baseline files
	Picture resolution: between 320 × 240 and 6144 × 4096 pixels (Sub sampling is 4:2:2 or 4:2:0)

- *4 The total combined maximum number of recognizable audio and picture contents and groups: 1000 audio and picture contents and 256 groups.

Video output:	
Output level:	1 Vp-p (75)
Output terminal:	Pin jack (1 system)
S video output:	
Y output level:	1 Vp-p (75)
C output level:	0.286 Vp-p (75) (DVD-K32PL/K32PLA) NTSC: 0.286 Vp-p (75) PAL: 0.300 Vp-p (75) (DVD-K32GCS)
Output terminal:	S terminal (1 system)
Component video output:	[NTSC: 525(480)p/525(480)i, PAL: 625(576)p/625(576)i] (DVD-K32GCS) [NTSC: 525(480)p/525(480)i] (DVD-K32PL/K32PLA)
Y output level:	1 Vp-p (75)
P B output level:	0.7 Vp-p (75)
P R output level:	0.7 Vp-p (75)
Output terminal:	Pin jack (Y: green, P B : blue, P R : red)
Number of terminals:	1 system
Video performance:	
Horizontal resolution:	More than 500 lines
Video S/N ratio:	More than 65dB
Audio output:	
Output level:	2 Vrms (1 kHz, 0 dB)
Output terminal:	Pin jack
Number of terminals:	
2 channel:	1 system
Audio performance:	
(1) Frequency response:	
DVD (linear audio):	4 Hz-22 kHz (48 kHz sampling) 4 Hz-44 kHz (96 kHz sampling)
CD audio:	4 Hz-20 kHz
(2) S / N ratio:	
CD audio:	115 dB
(3) Dynamic range:	
DVD (linear audio):	92 dB
CD audio:	90 dB
(4) Total harmonic distortion:	
CD audio:	0.003 %
Digital audio output:	
Coaxial digital output:	Pin jack
Pickup	
Wave length:	653 nm / 790 nm

Laser power:

CLASS 1 / CLASS 3A

Note:

Specifications are subject to change without notice.

Mass and dimensions are approximate.

Solder:

This model uses lead free solder (PbF).

Manufactures under license from Dolby Laboratories. "Dolby" and the double-D symbol are trademarks of Dolby Laboratories.

WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

1. SAFETY PRECAUTIONS

1.1. GENERAL GUIDELINES

1. When servicing, observe the original lead dress. If a short circuit is found, replace all parts which have been overheated or damaged by the short circuit.
2. After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.
3. After servicing, make the following leakage current checks to prevent the customer from being exposed to shock hazards.

1.1.1. LEAKAGE CURRENT COLD CHECK

1. Unplug the AC cord and connect a jumper between the two prongs on the plug.
2. Measure the resistance value, with an ohmmeter, between the jumpered AC plug and each exposed metallic cabinet part on the equipment such as screwheads, connectors, control shafts, etc. When

the exposed metallic part has a return path to the chassis, the reading should be between $1\text{M } \Omega$ and $5.2\text{M } \Omega$. / When the exposed metal does not have a return path to the chassis, the reading must be .

Figure 1

1.1.2. LEAKAGE CURRENT HOT CHECK (See [Figure 1](#) .)

1. Plug the AC cord directly into the AC outlet. Do not use an isolation transformer for this check.
2. Connect a $1.5\text{k } \Omega$, 10 watts resistor, in parallel with a $0.15\text{ } \mu\text{F}$ capacitors, between each exposed metallic part on the set and a good earth ground such as a water pipe, as shown in [Figure 1](#).
3. Use an AC voltmeter, with 1000 ohms/volt or more sensitivity, to measure the potential across the resistor.
4. Check each exposed metallic part, and measure the voltage at each point.
5. Reverse the AC plug in the AC outlet and repeat each of the above measurements.
6. The potential at any point should not exceed 0.75 volts RMS. A leakage current tester (Simpson Model 229 or equivalent) may be used to make the hot checks, leakage current must not exceed 1/2 milliamp. In case a measurement is outside of the limits specified, there is a possibility of a shock hazard, and the equipment should be repaired and rechecked before it is returned to the customer.

2. PREVENTION OF ELECTRO STATIC DISCHARGE (ESD) TO ELECTROSTATICALLY SENSITIVE (ES) DEVICES

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field-effect transistors and semiconductor "chip" components. The following techniques should be used to help reduce the incidence of component damage caused by electro static discharge (ESD).

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any ESD on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging ESD wrist strap, which should be removed for potential shock reasons prior to applying power to the unit under test.
2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the assembly.
3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.
4. Use only an anti-static solder removal device. Some solder removal devices not classified as "anti-static (ESD protected)" can generate electrical charge sufficient to damage ES devices.
5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.
6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive material).
7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.

Caution

Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.

8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity (ESD) sufficient to damage an ES device).

3. PRECAUTION OF LASER DIODE

CAUTION:

This product utilizes a laser diode with the unturned "on" invisible laser radiation is emitted from the pickup lens.
 Wave length: 653 nm~790 nm
 Maximum output radiation power from pickup: 100 μ W/VIS

Laser radiation from the pickup lens is safety level 1, but be sure the followings:

1. Do not disassemble the optical pickup unit, since radiation from exposed laser diode is dangerous.
2. Do not adjust the variable resistor on the pickup unit. It was already adjusted.
3. Do not look at the focus lens using optical instruments.
4. Recommend not to look at pickup lens for a long time.

**CAUTION:**

THIS PRODUCT UTILIZES A LASER.

USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

4. Service caution based on legal restrictions

4.1. General description about Lead Free Solder (PbF)

The lead free solder has been used in the mounting process of all electrical components on the printed circuit boards used for this equipment in considering the globally environmental conservation.

The normal solder is the alloy of tin (Sn) and lead (Pb). On the other hand, the lead free solder is the alloy mainly consists of tin (Sn), silver (Ag) and Copper (Cu), and the melting point of the lead free solder is higher approx.30°C (86°F) more than that of the normal solder.

Definition of PCB Lead Free Solder being used

Service caution for repair work using Lead Free Solder (PbF)

- The lead free solder has to be used when repairing the equipment for which the lead free solder is used. (Definition: The letter of "PbF" is printed on the PCB using the lead free solder.)
- To put lead free solder, it should be well molten and mixed with the original lead free solder.
- Remove the remaining lead free solder on the PCB cleanly for soldering of the new IC.
- Since the melting point of the lead free solder is higher than that of the

- normal lead solder, it takes the longer time to melt the lead free solder.
- Use the soldering iron (more than 70W) equipped with the temperature control after setting the temperature at $350\pm30^{\circ}\text{C}$ ($662\pm86^{\circ}\text{F}$).

Recommended Lead Free Solder (Service Parts Route.)

The following 3 types of lead free solder are available through the service parts route.

- RFKZ03D01K----- (0.3mm 100g Reel)
- RFKZ06D01K----- (0.6mm 100g Reel)
- RFKZ10D01K----- (1.0mm 100g Reel)

Note

* Ingredient: tin (Sn) 96.5%, silver (Ag) 3.0%, Copper (Cu) 0.5%, Cobalt (Co) / Germanium (Ge) 0.1 to 0.3%

5. PREVENTION OF STATIC ELECTRICITY DISCHARGE

The laser diode in the traverse unit (optical pickup) may brake down due to static electricity of clothes or human body. Use due caution to electrostatic breakdown when servicing and handling the laser diode.

5.1. Grounding for electrostatic breakdown prevention

Some devices such as the DVD player use the optical pickup (laser diode) and the optical pickup will be damaged by static electricity in the working environment. Proceed servicing works under the working environment where grounding works is completed.

5.1.1. Worktable grounding

1. Put a conductive material (sheet) or iron sheet on the area where the optical pickup is placed, and ground the sheet.

5.1.2. Human body grounding

1. Use the anti-static wrist strap to discharge the static electricity form your body.

5.1.3. Handling of optical pickup

1. To keep the good quality of the optical pickup maintenance parts during transportation and before installation, the both ends of the laser diode are short-circuited. After replacing the parts with new ones,

remove the short circuit according to the correct procedure. (See this Technical Guide.)

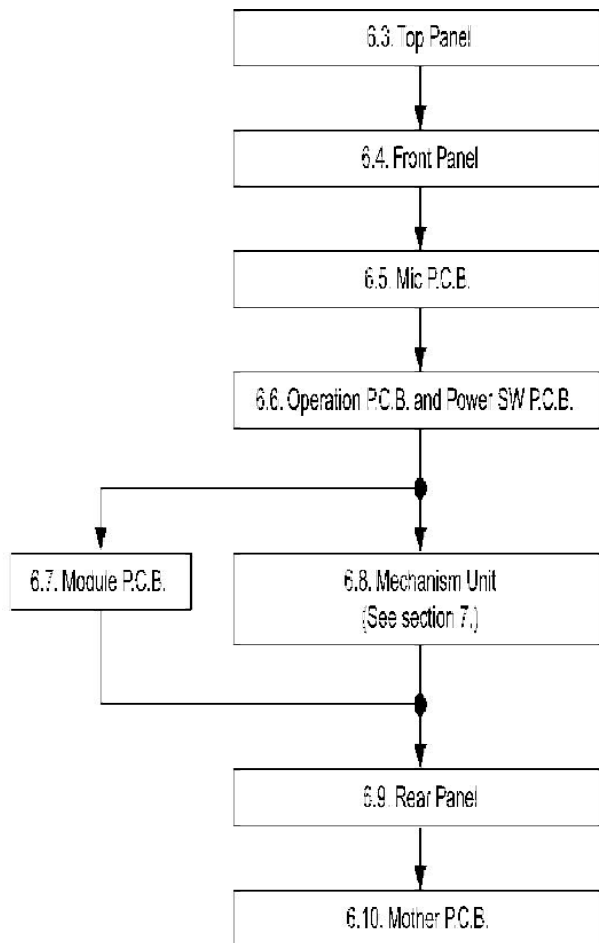

2. Do not use a tester to check the laser diode for the optical pickup. Failure to do so will damage the laser diode due to the power supply in the tester.

5.2. Handling Precautions for Traverse Unit (Optical Pickup)

1. Do not give a considerable shock to the traverse unit (optical pickup) as it has an extremely high-precise structure.
2. When replacing the optical pickup, install the flexible cable and cut its short land with a nipper. See the optical pickup replacement procedure in this Technical Guide. Before replacing the traverse unit, remove the short pin for preventing static electricity and install a new unit. Connect the connector as short times as possible.
3. The flexible cable may be cut off if an excessive force is applied to it. Use caution when handling the cable.
4. The half-fixed resistor for laser power adjustment cannot be adjusted. Do not turn the resistor.

6. DISASSEMBLING THE CASING AND CHECKING P.C.B.S

6.1. Disassembly Procedure

6.2. Casing Parts and P.C.B. Positions

6.3. Top Panel

1. Unscrew the screws.

6.4. Front Panel

1. Release the tabs and connectors.

2. Release the tabs.

6.5. Mic P.C.B.

1. Unplug the knob.

2. Unscrew the screws.

6.6. Operation P.C.B. and Power SW P.C.B.

1. Unscrew the screws.

6.7. Module P.C.B.

1. Remove the connectors.

2. Unscrew the screws.

3. Press each tab with the nipper to module PCB vertically.

6.8. Mechanism Unit

1. Unscrew the screws.

2. Release the tabs.

6.9. Rear panel

1. Unscrew the screws
2. Release the tabs.

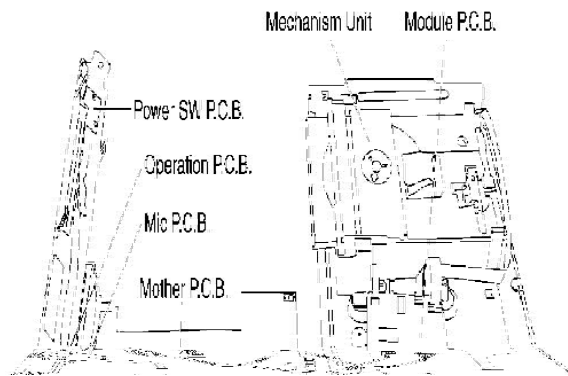

6.10. Mother P.C.B.

1. Unscrew the screws.

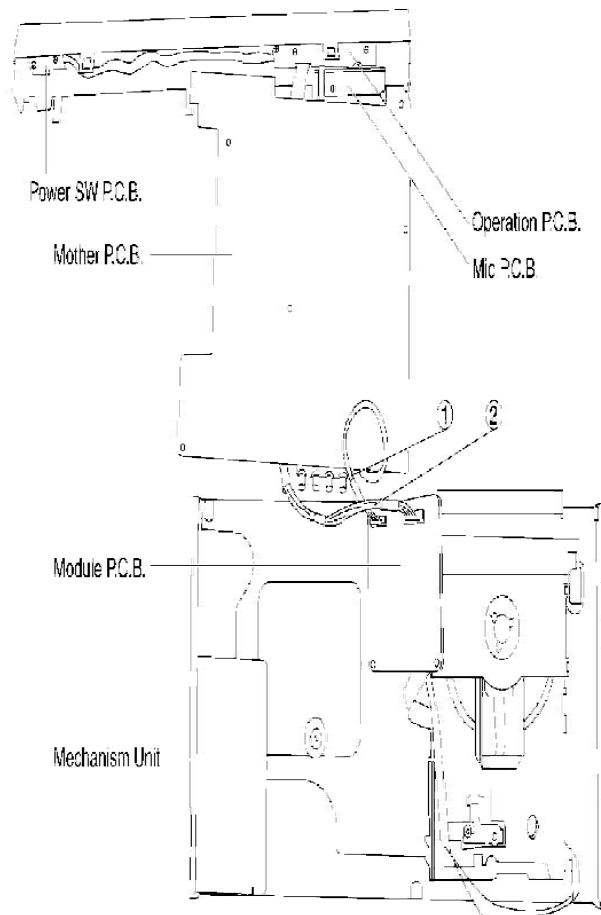

6.11. Service Position

6.11.1. Servicing position of the Module P.C.B.

6.11.2. Servicing position of the Mother P.C.B.

6.11.3. List of the Extension Cables

①	VUC8026	14p ns	PS8101(Module P.C.B.)—FP3501(Mother P.C.B.)
②	RFKZ0106	20p ns	PS8301(Module P.C.B.)—FP3502(Mother P.C.B.)

7. ASSEMBLING AND DISASSEMBLING THE MECHANISM UNIT

7.1. Disassembly Procedure

7.2. Traverse Unit

- 1. Slide the lever (A) in the arrow direction (to the opposite side) till it stops.**
- 2. Slide the lever (A) further by bending the tab at the right side of the lever A in the right direction. (The right groove opens and the boss becomes seen.)**
- 3. Open the lever (B) to left. (The 2 grooves at the left side open.)**

4. Remove the traverse unit

7.3. Tray

1. Slide the guide tray unit while pressing the stopper in the arrow direction, and remove the guide tray unit.

2. Raise the loading unit.

3. Slide the lever in the arrow direction till it stops and pull the tray out.

4. Spread the tabs at the both sides and pull the tray out. (The tray slides a little forward and stops.)

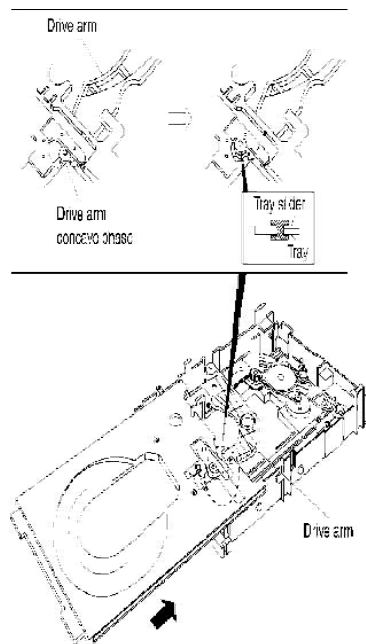

5. Remove the drive arm concave phase from the tray slider and tray.

<Assembling the tray unit>

- 1. Insert a part of the tray into the unit sliding over the groove on the mechanical chassis unit.**
- 2. Insert the tray to the point before the tab of the mechanical chassis unit.**

- 3. Hook the drive arm concave phase over the tray and the tray slider.**
- 4. Press in the tray.**
- 5. Make sure that the tray and the drive arm move smoothly.**

7.4. Loading section

1. Spread the tabs at the both sides and push out the drive arm shaft.

2. Hook the lock lever spring on the lock lever projection part temporarily.

3. Unlock the tab and remove the lock lever.

4. Remove the belt.
5. Unlock the tab and remove the pulley.
6. Remove the relay gear.

7. Turn the change lever in the arrow direction till it stops.
8. Hook the change lever spring on the change lever project part temporarily.

9. Pull the lever (B) in the bottom side to your side and remove the change lever.

10. Remove the drive rack, the sub rack and the drive gear.

7.5. Loading motor P.C.B.

1. Unscrew the screws

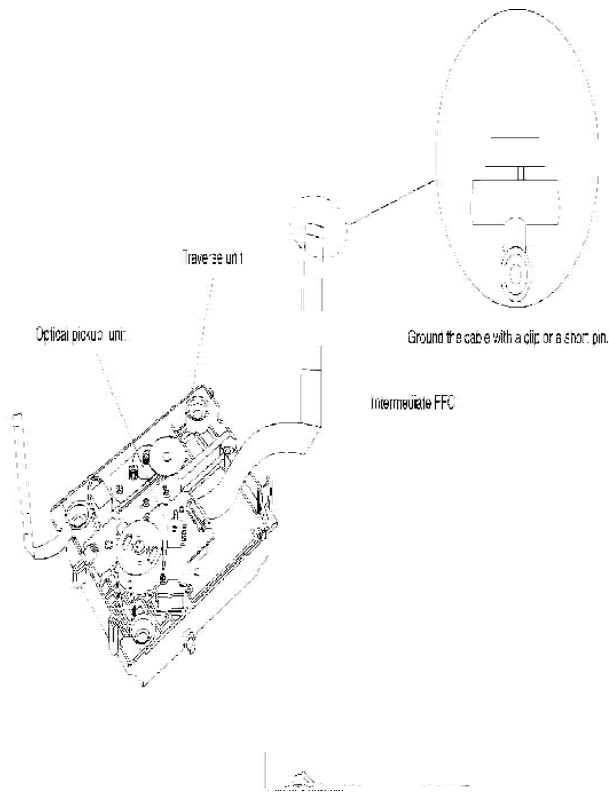

7.6. TRV Unit

7.6.1. Cautions to Be Taken in Handling the TRV Unit

The laser diode in the TRV unit may be damaged due to electrostatic discharge generating from clothes or human body. Use due caution to electrostatic discharge damage when servicing the laser diode.

1. Do not give a considerable shock to the TRV unit as it has an extremely high-precise structure.

2. To prevent the laser diode from the electrostatic discharge damage, the Intermediate FFC of the TRV unit removed from the PCB should be short-circuited with a short pin or a clip.
3. The Intermediate FFC may be cut off if an excessive force is applied to it. Use caution when handling the Intermediate FFC.

7.6.2. Procedure for Disassembling the TRV Unit

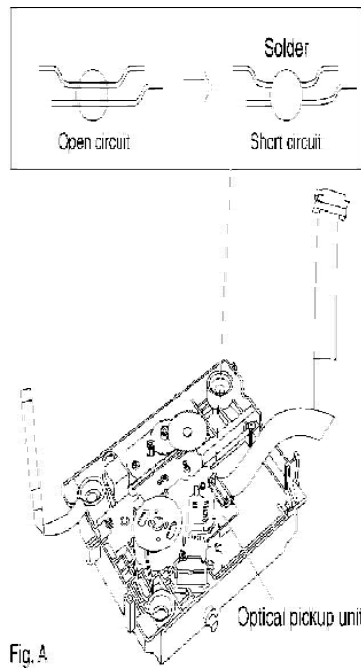

Notice

1. This section aims to focus on the disassembling methods of some parts in the case that no damage is occurred to optical pickup units.
2. When the optical pickup unit is defective, the overall traverse unit needs replacement.
3. Please note that appropriate actions needs to be taken to prevent static damage.

Caution

Insert the short pin into the FFC of the optical pickup unit. (See “Caution to be taken in handling the TRV Unit”)

1. Before changing 22P FFC, please weld the short-circuit solder. (refer to Fig. A)

2. Remove the connector, take out the 22P FFC.

- After changing the 22P FFC, please remove the solder. (refer to Fig. B)
3. Push the tabs on the back and remove the TRV Gear B and A.

4. Unscrew the screws.

5. Remove the drive rack.

Caution

Do not disassemble drive rack fixing screws repeatedly, otherwise the screws may hard to tighten and affect the accuracy of optical pickups consequently.

6. Remove the solders of the SP motor and the TRV motor.

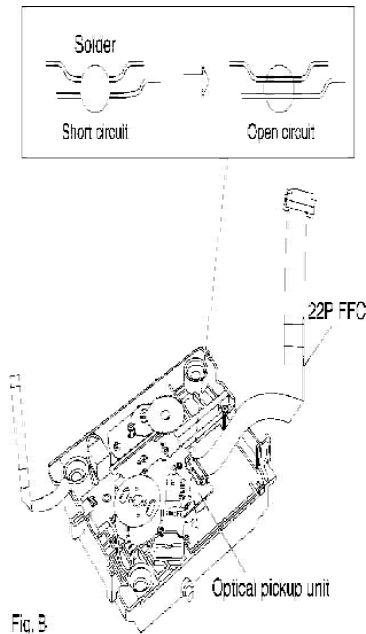

7. Unscrew the screws, then remove the TRV Motor and TRV SW P.C.B. Unit.

<Assembling the TRV unit>

- 1. After replacing the TRV Unit and connecting the 22P FFC, remove the solder on the optical pickup unit.**

Caution

1. Do not give a considerable shock to the optical pickup unit as it has an extremely high-precise structure.
2. Do not touch the lens in the optical pickup unit.
2. The FFC is fixed as shown below.

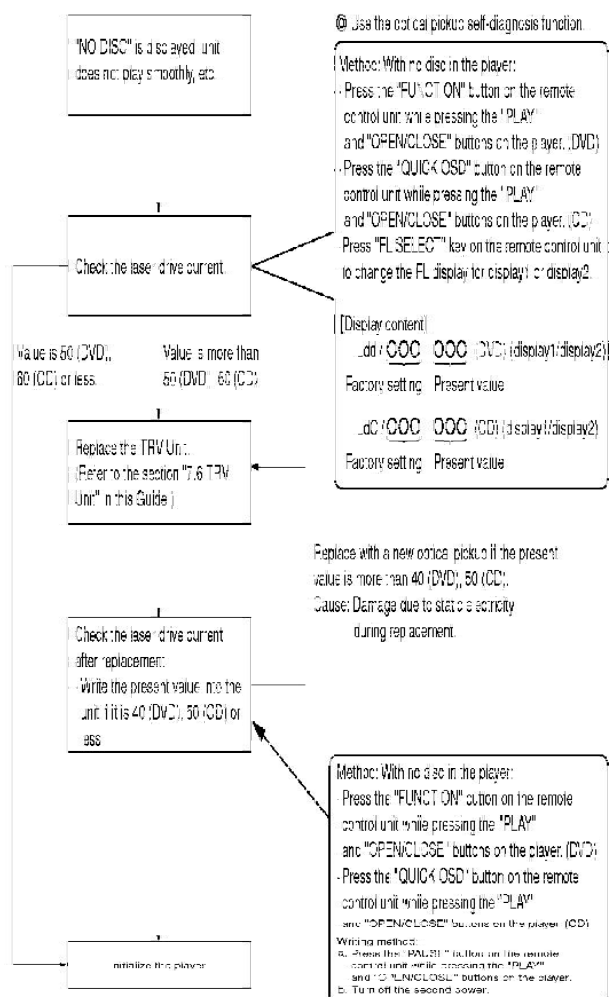

8. SELF-DIAGNOSIS FUNCTION AND SERVICE MODES

8.1. Optical Pickup Breakdown Diagnosis

The optical pickup self-diagnosis function has been included in this unit. When repairing, use the following procedure for effective Self-diagnosis . Be sure to use the self-diagnosis function before replacing the TRV Unit when "NO DISC" is displayed. As a guideline, you should replace the TRV Unit when the value of the laser drive current is more than 55.

Note:

Press the power button to turn on the power, and check the value within three minutes before the unit warms up. (Otherwise, the result will be incorrect.)

8.2. Service Mode Table 1

The service modes can be activated by pressing various button combination on the player and remote control unit. please carry out your operation based on the remote control supplied with Panasonic DVD player of previous models.

Player buttons	Remote control unit buttons	Application	Note
PLAY + OPEN/CLOSE	0	Displaying the UHF display F_ _ _	Refer to section 8.3. Self-Diagnostic Function (UHF Display).
	5	Jitter check, tilt adjustment *Display shows J_ xxx/yyy_ zz "yyy" and "zz" shown to the right have nothing to do with the jitter value. "yyy" is the error counter, while "zz" is the focus drive value.	
	6	Checking the region numbers and broadcast system	
	7	Checking the program version	Check the IC86 FLASH ROM program.
	9	Lighting Confirmation Function of Display Tube	
	FUNCTION	Checking the laser drive current	Refer to section 8.1. Optical Pick Replacement Procedure.
	PAUSE	Writing the laser drive current value after replacing the optical pickup (do not use for anything other than optical pickup replacement)	
	POWER	Initializing the DVD player (restoring factory preset settings)	Refer to section 8.5. Initializing DVD player.

8.3. DVD Self Diagnostic Function-Error Code

Error Code	Error Content	Additional error explanation	Defect 1	Defect 2	Defect 3	Defec
U11	Focus error	Focus coil, FE singal error	TRV Unit	DV4.1 (IC8001)		
H01	Tray loading error	LD motor error, DV4.1 (IC8001) error	LD Motor	IC8251		
H02	Spindle servo error	(Spindle servo, DV4.1 (IC8001) SP motor, CLV servo error)	LD Motor	DV4.1 (IC8001)		
H03	Traverse servo error	Traverse servo, DV4.1 (IC8001) , TRV motor error	TRV Motor	DV4.1 (IC8001)		
H04	Tracking servo error	Tracking coil, DV4.1 (IC8001) error	TRV Unit	DV4.1 (IC8001)		
H05	Seek error	TRV Motor, IC8251 error	TRV Motor	IC8251		
H07	Spindle motor drive error	SP motor current error, IC8251 error	TRV Unit	IC8251		
F893	FROM falsification	Firmware soft error, DV4.1 (IC8001) error	FROM (IC8651) (*1)	DV4.1 (IC8001)		
F895	Language area abnormality	Firm version agreement check for factory preset setting failure prevention	FROM (IC8651) (*1)			
F897	initialize is not completed	Initialize completion check for factory preset setting failure prevention				

Note:

An error code will be canceled if a power supply is turned OFF.

***1: When FROM or Module P.C.B is replaced ,be sure to write the present value into the player as the initial setting of laser drive current . (Refer to section 8.5 initial setting of laser drive current .)**

Writing method :

- a. Press the "PAUSE" button on the remote control unit while pressing the "PLAY" and "OPEN/CLOSE" buttons on the player.**
- b. Turn off the second power.**

8.4. Last Error Code saved during NO PLAY

Error code	Error Content	Condition	Available butto
F0C0	DVD : Cannot playback because it is not DVD Video	The DVD-ROM/-R/-RW/+R/+RW is not MP3/JPEG/DVD-Video format	POWER, OPEN/CLOSE
F0C1	DVD : Prohibited by the restricted region code	The region code of DVD is not right .	POWER, OPEN/CLOSE
F0C2	DVD : PAL restricted playback	When put the DVD-PAL disc into the NTSC only player	POWER, OPEN/CLOSE
F0C3	DVD : Parental lock setting prohibits the playback of the entire title	“LOCK ALL” of the DISC-RATINGS has been chose.	POWER, OPEN/CLOSE

8.5. Service mode table 2

Pressing various button combinations on the player and remote control unit can activate the service modes.

Please carry out your operation based on the remote control supplied with Panasonic DVD player of previous models.

Item	Player mode and button combination	Function	Display	Cancellation method
Still check	In F.LAY mode, press PLAY and OPEN/CLOSE buttons on the power on button of the remote control unit. (Press "EJECT" key on the remote control unit) to change the FL display to Disc or Display.	After check, when the measured and displayed measurement is repeatedly done in the cycle of one second. Each time counter starts from zero to 100 times setting. When the check data failed to be read out, the counter automatically increments. When the failure is caused by minor error, it may be corrected when returned to stable successfully reading. In this case, the counter advances by one. When the error persists even after this, the counter may jump the five or more.	 <p>After data is stored, it is automatically one place of decimal. First, a value is stored in the decimal position.</p>	Press STOP or OPEN/CLOSE button.
Error code check	In STOP position of PLAY mode, press PLAY and OPEN/CLOSE buttons on the power on button of the remote control unit. With pressing of button.	Error code check: the latest error code stored in FLASH ROM is displayed.	Error code (play error) is expressed in the following convention: Error code = 00000000 → No error Error code = 00000001 → F0C0 Error code = 00000002 → F0C1 Error code = 00000003 → F0C2 Error code = 00000004 → F0C3 Error code = 00000005 → F0C4 Error code = 00000006 → F0C5 Error code = 00000007 → F0C6 Error code = 00000008 → F0C7 Error code = 00000009 → F0C8 Error code = 0000000A → F0C9 Error code = 0000000B → F0CA Error code = 0000000C → F0CB Error code = 0000000D → F0CC Error code = 0000000E → F0CD Error code = 0000000F → F0CE Error code = 00000010 → F0CF Error code = 00000011 → F0D0 Error code = 00000012 → F0D1 Error code = 00000013 → F0D2 Error code = 00000014 → F0D3 Error code = 00000015 → F0D4 Error code = 00000016 → F0D5 Error code = 00000017 → F0D6 Error code = 00000018 → F0D7 Error code = 00000019 → F0D8 Error code = 0000001A → F0D9 Error code = 0000001B → F0DA Error code = 0000001C → F0DB Error code = 0000001D → F0DC Error code = 0000001E → F0DD Error code = 0000001F → F0DE Error code = 00000020 → F0DF Error code = 00000021 → F0E0 Error code = 00000022 → F0E1 Error code = 00000023 → F0E2 Error code = 00000024 → F0E3 Error code = 00000025 → F0E4 Error code = 00000026 → F0E5 Error code = 00000027 → F0E6 Error code = 00000028 → F0E7 Error code = 00000029 → F0E8 Error code = 0000002A → F0E9 Error code = 0000002B → F0EA Error code = 0000002C → F0EB Error code = Item	Player mode and button combination	Function	Display	Cancellation method
Version display	In STOP mode, press FLY and OPEN/CLOSE buttons on the player, and FLY button on the remote control unit. (Press FLY, SET, EJECT key on the remote control unit to change the FLY display to Display1 or Display2.)	Version display	<p>When check the item, connect this player to monitor TV and check on watching the display shown on the monitor.</p>	Cancelled automatically 5 seconds later.
Lighting of display tube	In any mode, press PLAY and OPEN/CLOSE buttons on the player, and FLY button on the remote control unit.	Lighting of display tube		Repeat the same operation.
Deer's lock	In PLAY mode, press PLAY and OPEN/CLOSE buttons on the player, and QUICK REPLAY button on the remote control unit.	Deer's lock The deer's lock is ON or OFF. When deer's lock is ON, it prohibits switching off of the secondary power and the opening. When the lock's switch is ON/OFF status is stored in FLASH ROM.	<p>LOCK sign appears when deer's lock is switched on or other secondary power key or the clearing key is pressed while the lock is ON.</p> <p>UNLOCK sign appears when deer's lock is switched off.</p>	Repeat the same operation.
Initialization	In STOP mode, press PLAY, POWER and OPEN/CLOSE buttons on the player for 3 seconds or longer.	Initialization User settings are cancelled and player is initialized to factory setting.	Initialization	
Attest	When initialization by the user is being performed and the player is stopped on the FLY, press FLY and OPEN/CLOSE buttons on the player.	Initialization User settings are cancelled and player is initialized to factory setting. All of the error codes saved in the PROM are cancelled.	RESET	
Region display	In STOP mode, press FLY and OPEN/CLOSE buttons on the player, and FLY button on the remote control unit.	Region display		Cancelled automatically 5 seconds later.

Item	Player mode and button combination	Function	Display	Cancellation method
Time 1 check	In STOP mode, press FLY button on the remote control unit.	Time 1 check	Time 1 check	Cancelled

8.6. Sales demonstration lock function

This function prevents discs from being lost when the unit is used for sales demonstrations by disabling the disc eject function. "LOC" is displayed on the unit, and ordinary operation is disabled.

8.6.1. Setting

The sales demonstration lock is set by simultaneously pressing PLAY and OPEN/CLOSE buttons on the player and QUICK REPLAY button on the remote control unit for 1 second or longer.

8.6.2. Cancellation

The lock can be cancelled by the same procedure as used in setting. ("UNLOC" is displayed on cancellation. Disconnecting the power cable from power outlet does not cancel the lock.)

8.7. Handling After Completing Repairs

Use the following procedure after completing repairs.

8.7.1. Method

Confirm that the power is turned on:

1. Press the "OPEN/CLOSE" button to close the tray.
2. Press the "POWER" button to turn off the power.
3. Disconnect the power plug from the outlet.

8.7.2. Precautions

Do not disconnect the power plug from the outlet with the tray still open, then close the tray manually.

9. SERVICE PRECAUTIONS

9.1. Recovery after the DVD player is repaired.

- The DVD player requires no recovery process after it is repaired; therefore, there is no necessity of using recovery disc.
- Models that require no recovery process are listed as below(As of Feb.2006):
 - *DVD-K32
 - *DVD-S32
 - *DVD-S1

9.2. Firmware version-up of the DVD player

- The firmware of the DVD player may be renewed to improve the quality including operationability and playability to the substandard discs.
Make sure to observe the following rules when performing version-up.

Note:

When FROM or module P.C.B. is replaced, carry out the process of firmware version-up.

- The latest firmware required for version-up can be downloaded from TSN -WEB [Support Information from NWBG-PAVC].
When it is finished, use burning software to make up a version-up disc

in the form of CD-R.

Note:

Do not modify the file name of downloaded data at random; keep the original file names for disc burning. Make sure to select normal format instead of image format.

If you may not be able to complete a downloading from the TSN-WEB page, please obtain the file through your local Panasonic Service Organization.

- Updating firmware

- 1. Load the version-up disc that is supplied to the player and run it.**
- 2. Firmware version of the player is automatically checked. Appropriate message appears whenever necessary.**
- 3. Using remote controller's " ENTER" button or player's "OPEN/CLOSE" button, select whether version updating is to be done or not according to the message appearing on the screen.**
- 4. a. If " ENTER" is pushed, version updating is performed.
b. If " OPEN/CLOSE" is pushed, version updating is cancelled.**
- 5. a. When updating is finished, the player will restart. Remove the disc after the tray has opened automatically.
b. Remove the disc.**
- 6. a. Write the present value into the player as the initial setting of laser drive current. (Refer to section 8.5 initial setting of laser drive current .)**
- 7. Turn off the power.**

Note:

If the AC power supply is shut out during version-up due to a power failure, the version-up is improperly carried out.

In such a case, replace the FROM and carry out the version-up again.

10. ADJUSTMENT PROCEDURES

10.1. Service Tools and Equipment

Application	Name	Number
Inspection	Extension cable (module P.C.B. to mother P.C.B.)	VUC8026
	Extension cable (module P.C.B. to mother P.C.B.)	RFKZ0106
Others	Hanarl	VFK1784
	Grease	RFKXPG641
	Drysurf	RFKXGUD24
Confirmation	CD test disc	PVCD-K06 or any other commercially available disc
	VCD test disc	PVCD-K06 or any other commercially available disc
	DVD test disc	DVDT-S15 or DVDT-S01

10.2. Important points in electrical adjustment

- Follow the adjustment procedures described in this Manual.

10.3. Storing and Handling Test Discs

- Surface precision is vital for DVD test discs. Be sure to store and handle them carefully.

1. Do not place discs directly onto the workbench, etc., after use.
2. Handle discs carefully in order to maintain their flatness. Place them into their case after use and store them vertically. Store discs in a cool place where they are not exposed to direct sunlight or air from air conditioners.
3. Accurate adjustment will not be possible if the disc is warped when placed on a surface made of glass, etc. If this happens, use a new test disc to make optical adjustments.
4. If adjustment is done using a warped disc, the adjustment will be incorrect and some discs will not be playable.

14. INTERCONNECTION SCHEMATIC DIAGRAM & SCHEMATIC DIAGRAM NOTES

14.1. INTERCONNECTION SCHEMATIC DIAGRAM

14.2. SCHEMATIC DIAGRAM NOTES

This schematic diagram may be modified at any time with the development of new technology.

Important safety notice:

Components identified by mark have special characteristics important for safety.

Furthermore, special parts which have purpose of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacture's specified parts shown in the parts list.

Important safety notice:

There are special components used in this equipment which are important for safety.

These parts are marked by in the schematic diagrams. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire, or other hazards. Do not modify the original design without permission of manufacturer.

Caution!

IC and LSI are sensitive to static electricity.

Secondary trouble can be prevented by taking care during repair.

Cover the parts boxes made of plastics with aluminum foil.
Ground the soldering iron.
Put a conductive mat on the work table.
Do not touch the legs of IC or LSI with the fingers directly.

18. REPLACEMENT PARTS LIST

Notes:

*Important safety notice:

Components identified by  mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacture's specified parts shown in the parts list.

*Warning: This product uses a laser diode. Refer to caution statements.

*Capacity values are in microfarads (μ F) unless specified otherwise, P=Pico-farads (pF), F=Farads (F).

*Resistance values are in ohms, unless specified otherwise, 1K=1,000 (OHM), 1M=1,000k (OHM).

*The marking (RTL) indicates the retention time is limited for this item. After the discontinuation of this

assembly in production, it will no longer be available.

*(IA)-(IC)", marks in Remarks indicate languages of instruction manuals. [(IA): English, (IB): Traditional Chinese, (IC): Spanish/Portuguese]

*All parts except parts mentioned [SPC] in the Remarks column are supplied by PAVCSG.

*Parts mentioned [SPC] are supplied by PAVC-CSG.

14 INTERCONNECTION SCHEMATIC DIAGRAM & SCHEMATIC D

14.1. INTERCONNECTION SCHEMATIC DIAGRAM

IATIC DIAGRAM NOTES

DVD-K32GCS/PL/PLA
INTERCONNECTION SCHEMATIC DIAGRAM

14.2. SCHEMATIC DIAGRAM NOTES

This schematic diagram may be modified at any time with the development of new technology.

Important safety notice:

Components identified by \triangle mark have special characteristics important for safety.

Furthermore, special parts which have purpose of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacture's specified parts shown in the parts list.

Important safety notice:

There are special components used in this equipment which are important for safety.

These parts are marked by \triangle in the schematic diagrams. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire, or other hazards. Do not modify the original design without permission of manufacturer.

Caution!

IC and LSI are sensitive to static electricity.

Secondary trouble can be prevented by taking care during repair.

Cover the parts boxes made of plastics with aluminum foil.

Ground the soldering iron.

Put a conductive mat on the work table.

Do not touch the legs of IC or LSI with the fingers directly.
